***Wisconsin Business Development
Announces
2009 Wisconsin Business Innovation Award***

Wisconsin Business Development is pleased to present Stephen Metcalf and Hans Ulland of Air Motion Systems, Inc. with the 2009 Wisconsin Business Development Innovation Award. The award will be presented to the owners at the WBD Annual Meeting to be held on November 19, 2009.

Each year, Wisconsin Business Development recognizes one of their small business customers that have distinguished themselves through innovative products and services, especially in the area of technology, agriculture, safety, environmental services or manufacturing processes. This award is given to recognize a business that continues to innovate while providing quality jobs and improving the local economy.

Air Motion Systems, Inc., the maker of an innovative UV curing system (P3 UV System) was formed in 1997. In 2001, the company released its UV system called Peak UV, revolutionizing the UV curing arena for the graphic arts industry.

In 2008, Air Motion Systems, Inc. relocated their operations from Colorado to a new 36,000 sq. ft. facility in River Falls, WI. The new facility is one of the first LEED Certified "green" buildings in WI. It combines a modern design with functional requirements for a technology-oriented original equipment manufacturer. The latest product, PEAK LED-UV was introduced in early September and its patent-pending design achieves twice the radiant power while using 20% of the electricity required from a conventional mercury arc lamp.

Air Motion Systems, Inc. is one of the world's leading providers of UV curing technology to the graphic arts industry. The company has long been a pioneer in the development of new UV technology and its award-winning P3 UV system is now the leading arc lamp UV system for the printing industry in North America.

Since 1981, WBD has been partnering with Wisconsin financial institutions and is proud to have funded more than \$1.5 billion of community development projects, creating more than 25,000 jobs statewide. Over the years, WBD has developed expertise in finding solutions and strategies for small businesses looking to grow. WBD employees, located in eight offices across the state, take a personal interest in each customer doing their part to keep Wisconsin working.
